Open world assumptions :-

open world assumption is the assumption that the truth value of a statement may be true irrespective of whether or not it is known to be true.

1. one parent goal having one child goal

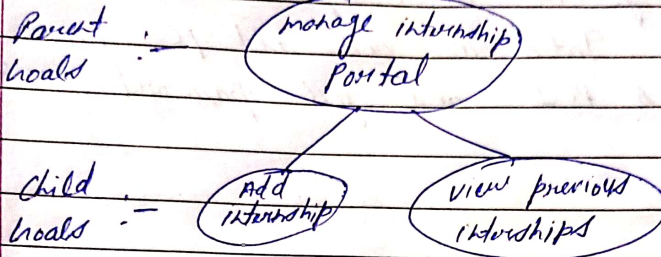

if the student doesnot satisfy the selection criteria for internship of a company like CPI qualification and other criterias like branch , hackathons wins etc then he will not be able to apply for a company for internship.

2. One parent goal having multiple child goals.

Admin can manage internship portal. He can add a new internship in internship portal or view previous internships that he added and responses of them. It is an OR decomposition as he can do either goal to fulfill parent goal.
